RULES VIDEO

Three mazes. Three levels. One CRAZY challenge. Using four buzzers, work as a team to guide your character Up, Down, Left, and Right through each maze. Reach the goal before the timer hits zero to unlock the next level! Run out of time and your team takes a strike and must replay the level.

Before we press start, YOU need to place a BET. Wager any of the points you've earned so far. How confident are you that you'll conquer all three levels? Three strikes, and it's GAME OVER! You lose your wager. **But, clear all three levels and you beat the game and WIN your wager!**

POST-VIDEO INSTRUCTIONS

Alright, teams! Step up to buzzers 1 through 4! You'll use these to move your character up, down, left, and right. Which buzzer does what? That's for you to figure out!

First, we need to make a wager! You can wager any amount of the points you've earned in the entire show. If you beat all three levels, you win that wager. If you fail three levels, you'll lose those points.

Now, let's choose your character! *[Choose Characters]*

[Teams with more than four players will rotate players between levels so everyone gets a turn.]

HERE WE GO!

HANDLE IT

MAZE CRAZE

GAMEPLAY & SCORING

What if one team completes a level but the other doesn't?

That's the game! The two teams are on separate paths. The next play will have them on separate levels. It will keep track of levels and strikes independently of one another.

If one team finishes or crashes out early, they will watch the other team succeed or fail on subsequent rounds hoping for their downfall!

How much is a team allowed to wager?

A team is allowed to wager anything from 0 up to their entire score from the show.

If a team has no points, they can always wager up to 500 points. Teams can always wager as little as 0.

If one team has more than double the other team's score, you can make a game-time decision on whether the teams need to wager at least half their score or not.

What if a team has more than 4 team members?

Have them select 4 team members to go first, then swap out for different team members on successive mazes.

GUESTS & SAFETY

What if the other team tries to distract a team?

Nothing against it in the rules! They can be as competitive as they want to be so long as they are not physically messing with the other team's buzzers or screen area.

TECH & PROPS

What if a buzzer is broken?

There is an option to reassign a buzzer on the host iPad. Choose which buzzers you want active for the game to be able to continue the game!

If all buzzers are broken, skip the game (and contact Store Support)!

What if a buzzer breaks mid-round?

Attempt to fix the buzzer and redo the round before the clock hits zero. If it is not repairable, have that team sit out and allow the other team to continue. Then replay the game and have the broken team try again.

HIGHLIGHT REEL HELP

Record guests frantically pushing buzzers, winning a level, or getting a strike!
